

Test Plan — VWO-49 (KAN-6): VWO Login Dashboard

Status: **DRAFT — pending human review.** Not approved until a QA owner signs off.
Author: Supriya Wadekar
Source ticket: KAN-6 (summary: "VWO-49") — VWO Login Dashboard PRD

1. Scope & Objectives

- **In scope:**
 - Functional: email/password login, Remember Me, Forgot Password / reset flow, real-time validation, error handling, session timeout, 2FA (optional), SSO (enterprise), light/dark mode
 - Non-functional: security (HTTPS, rate limiting, secure storage, GDPR/CCPA), performance (sub-2s load, concurrency), accessibility (WCAG 2.1 AA), responsive/mobile
 - Integration: transition to VWO core dashboard, analytics login success/failure events, support system links
- **Out of scope:**
 - VWO core platform features (experiments, heatmaps, personalization) beyond the login transition
 - Social login (Google/Microsoft) — listed as optional/future
 - Biometric / adaptive authentication (future enhancement)
 - Backend password hashing internals (verified only indirectly / via design review)
- **Objective:** Define what "tested" means for the VWO login dashboard so that a QA engineer can confirm the login experience meets the PRD's functional, security, performance, and accessibility requirements — and surface gaps that block sign-off.

2. Gaps & Questions for the author

#	Area	Finding (⚠️/❌)	Question to author
1	Acceptance criteria	❌ No explicit, testable ACs (pass/fail) anywhere in the ticket	Can you provide numbered ACs per feature (login, reset, 2FA, SSO)?

#	Area	Finding (⚠️/❌)	Question to author
2	2FA	⚠️ "Optional 2FA support" — no methods (TOTP/SMS/email) or enrollment flow	Which 2FA methods are in scope for this release? Where is enrollment managed?
3	SSO	⚠️ SAML/OAuth mentioned, no IdP config or test accounts	Which IdP(s) must be supported (Okta/Azure AD/other)? Can we get a test tenant?
4	Session timeout	⚠️ "Configurable timeout periods" — no default value	What is the default idle timeout? Is it per-role or global config?
5	Password rules	⚠️ "Enforced security standards" — no complexity spec	What are the min length / complexity rules for new passwords?
6	Rate limiting	⚠️ "Request throttling" — no threshold N	After how many failed attempts does lockout trigger? What's the lockout duration / message?
7	Error messages	⚠️ "Clear, actionable" — no verbatim strings	Provide exact error text for invalid credentials, locked account, empty fields, invalid email
8	Remember Me	⚠️ Persistent session — no expiry	What's the Remember Me session duration vs normal session? Cookie vs token?
9	Dark mode	⚠️ Announcement banner mentions Light/Dark toggle — no spec	Is dark mode part of this ticket? Default mode? Persisted preference?
10	Test data/env	❌ No URLs, accounts, or environments given	Which env URLs (QA/UAT), test accounts, and IdP test users should we use?
11	Analytics	⚠️ "Login success/failure tracking" — no event names	What are the exact event names/properties to assert?
12	Roles/permissions	❌ No role matrix	What roles exist (admin/user/enterprise) and how do they affect the login flow?
13	i18n	❌ Not mentioned	Is the login page localized? Which locales?
14	Boundaries	⚠️ Empty/0/1/max not specified	Confirm behavior for empty fields, 1-char password, max-length input, unicode email
15	A11y tooling	⚠️ WCAG 2.1 AA target — no audit baseline	Which screen readers/browsers form the a11y test matrix? Any existing audit?

3. Test Scenarios

ID	Priority	Type (pos/neg/boundary)	Scenario	Maps to (AC / gap)
TS-1	P0	positive	Successful login with valid email + password redirects to VWO core dashboard	PRD §Functional (Gap 1)
TS-2	P0	positive	Auto-focus lands on first input field on page load	PRD UX
TS-3	P0	positive	Remember Me checked → session persists across browser restart	PRD Remember Me (Gap 8)
TS-4	P1	positive	Remember Me unchecked → re-auth required after browser restart	PRD Remember Me (Gap 8)
TS-5	P0	positive	Forgot Password: registered email → reset link sent, token valid once	PRD Password Mgmt (Gap 1)
TS-6	P1	positive	Password reset with strong new password succeeds; re-login works	PRD Password Mgmt (Gap 5)
TS-7	P1	positive	Enterprise SSO login via IdP redirects back authenticated	PRD SSO (Gap 3)
TS-8	P1	positive	Optional 2FA: valid code completes login	PRD 2FA (Gap 2)
TS-9	P0	negative	Invalid credentials → generic error, no field-specific leakage	PRD Error Handling (Gap 7)
TS-10	P0	negative	Empty email/password on submit → inline validation errors, no request	PRD Validation
TS-11	P1	negative	Malformed email (e.g. <code>user@domain</code>) on blur → format error	PRD Validation
TS-12	P1	negative	Non-registered email in Forgot Password → generic response (no account enumeration)	PRD Security (Gap 7)
TS-13	P0	negative	Exceed rate limit → lockout message, further attempts blocked	PRD Rate Limiting (Gap 6)
TS-14	P1	negative	Expired/used reset token → error, token cannot be reused	PRD Password Mgmt
TS-15	P1	negative	Invalid 2FA code (wrong/expired) → error, login blocked	PRD 2FA (Gap 2)
TS-16	P0	negative	Session idle timeout → auto logout, re-auth required	PRD Session Mgmt (Gap 4)
TS-17	P1	boundary	Password at min length (boundary) accepted; one char below rejected	PRD Password Rules (Gap 5)

ID	Priority	Type (pos/neg/boundary)	Scenario	Maps to (AC / gap)
TS-18	P2	boundary	Max-length input (email/password) handled without truncation error	Gap 14
TS-19	P1	boundary	Empty-state: no accounts/roles → appropriate error or signup CTA	Gap 14
TS-20	P0	security	http:// URL redirects to https:// (HTTPS enforcement)	PRD Security
TS-21	P0	security	Network capture: credentials transmitted over TLS, no plaintext	PRD Data Protection
TS-22	P1	security	No session hijacking: token regenerated on login, session cookie flags (Secure/HttpOnly)	PRD Session Security
TS-23	P1	security	GDPR/CCPA: data export/delete request path functional	PRD Compliance
TS-24	P0	performance	Login page loads and is interactive within 2s on standard connection	PRD Performance (Gap 10)
TS-25	P2	performance	Concurrent logins (thousands simulated) — no degradation / 99.9% uptime	PRD Scalability
TS-26	P0	a11y	Full keyboard navigation (Tab/Shift+Tab/Enter/Space) with visible focus	PRD A11y
TS-27	P1	a11y	Screen reader (NVDA/VoiceOver) announces all fields, labels, errors	PRD A11y (Gap 15)
TS-28	P1	a11y	High contrast mode renders all elements accessible	PRD A11y
TS-29	P1	responsive	Mobile viewport: touch targets ≥ recommended size, usable layout	PRD Responsive
TS-30	P2	positive	Light/Dark mode toggle renders correctly in both modes, persisted	PRD Theme (Gap 9)
TS-31	P1	positive	Loading state shown during auth processing; double-submit prevented	PRD UX
TS-32	P1	integration	After login, analytics fires login-success event with expected properties	PRD Analytics (Gap 11)
TS-33	P2	integration	Failed logins fire login-failure event	PRD Analytics (Gap 11)
TS-34	P2	compatibility	Login works on Chrome, Firefox, Edge, Safari (desktop + mobile)	PRD Platforms

4. Test Data & Environment

- **Data:**
 - Valid user: active email + password (QA-created)
 - Invalid user: wrong password; unregistered email
 - Boundary passwords: exactly at min length, one char below, max length
 - Registered + unregistered emails for Forgot Password
 - 2FA: valid, wrong, expired codes
 - SSO: test IdP user (pending IdP details — Gap 3)
- **Environment / flags:**
 - QA URL: **TBD** (Gap 10) — expected <https://app.vwo.com>
 - Feature flags: 2FA, SSO, dark mode toggles per env
 - HTTPS enforced; CDN in use
- **Roles / permissions:**
 - Standard user, enterprise/SSO user, admin (role matrix TBD — Gap 12)

5. Risks & Assumptions

- **Assumptions made:**
 - Ticket KAN-6 (summary "VWO-49") describes the VWO login dashboard at <https://app.vwo.com>
 - "Optional 2FA" and "SSO" are in scope for this release unless marked future
 - Light/dark mode toggle is part of the current UI (announcement banner) and in scope
 - WCAG 2.1 AA is the accessibility bar; mobile-first responsive design expected
- **Risks:**
 - No explicit ACs → test interpretation may diverge from product intent (blocking)
 - Missing env URLs/accounts → execution cannot start in QA (blocking)
 - 2FA/SSO details undefined → scenarios TS-7/8 may need rework
 - Rate-limit threshold unknown → TS-13 cannot assert exact lockout behavior
 - Analytics event names unconfirmed → TS-32/33 assertions provisional

6. Entry / Exit criteria

- **Entry:**
 - QA environment URL + test accounts available

- Build with login dashboard changes deployed
 - Test plan reviewed and approved
 - ACs confirmed by author (or gaps resolved)
 - **Exit:**
 - All P0/P1 scenarios executed and passed (or defects logged)
 - P0 security/perf/a11y scenarios verified
 - Critical/High defects resolved or waived by product owner
 - Test summary + defect report delivered
-

HUMAN REVIEW GATE

- **I assumed:** KAN-6 ↔ VWO-49 login dashboard scope; 2FA/SSO/dark mode in scope; `app.vwo.com` is the target
- **I could not confirm:** explicit ACs, env URLs, test accounts, rate-limit threshold, timeout value, password rules, IdP details, analytics event names, role matrix, i18n scope
- **Open questions blocking sign-off:** Gap #1 (ACs), #10 (env/data), #6 (rate limit), #4 (timeout), #5 (password rules), #3 (SSO), #2 (2FA), #7 (error text), #11 (analytics), #12 (roles), #15 (a11y matrix)
- ► **Approve, or edit, before I write test cases / automation.**
